Location: Uttar Pradesh, India | Remote contractor availability

PROFESSIONAL SUMMARY

Native Bhojpuri speaker from Uttar Pradesh, raised around Bhojpuri in family, peer, and local community settings. Strong spoken fluency and comprehension, with practical written ability for review, editing, and translation tasks when aligned to project style and spelling guidelines. Combines native Bhojpuri judgment with data-analyst habits: careful review, evidence-based feedback, consistency checks, and clear written explanation. Dedicated to improving foundational LLM performance through high-fidelity Bhojpuri data annotation and RLHF-style evaluation.

LANGUAGE AND AI TRAINING SKILLS

- Bhojpuri: Native spoken fluency and comprehension; lifelong family and peer usage in Uttar Pradesh; practical written ability for review, editing, and translation with style-guide alignment.
- Hindi and English: Professional working proficiency; comfortable explaining Bhojpuri-Hindi-English meaning, tone, code-switching, and regional nuance.
- Translation and Editing: Bhojpuri content review, English-to-Bhojpuri sense checking, Bhojpuri-to-English meaning transfer, grammar review, tone review, terminology consistency, conversational naturalness.
- AI Training and Annotation: Response evaluation, data annotation, error labeling, prompt-response review, guideline-based assessment, quality feedback, RLHF-style preference review.
- Data Quality: SQL, Python, Pandas, Excel, data cleaning, quality checks, root-cause analysis, segmentation, hypothesis testing.

BHOJPURI EVALUATION FOCUS

- Evaluate whether Bhojpuri output sounds native, culturally appropriate, and contextually faithful rather than literal, Hindi-heavy, or machine-like.
- Review morphology and syntax signals such as pronoun choice, verb forms, tense/aspect usage, word order, and agreement patterns.
- Check semantic accuracy, register, politeness, idioms, code-switching, and whether the output preserves the user's intent.
- Write concise English feedback explaining what is wrong, why it sounds unnatural, and how to improve the output.

RELEVANT EXPERIENCE

Data Analyst and Language Evaluation Adjacent Work

- Apply structured review methods to evaluate data quality, identify inconsistencies, and explain corrective actions in clear written language.
- Convert ambiguous problems into review criteria, labels, hypotheses, and decision-ready recommendations.
- Work with messy datasets using SQL, Python, Pandas, and Excel, reinforcing attention to detail and repeatable quality-control habits.
- Build analytical narratives from evidence, a useful foundation for evaluating AI-generated language output and explaining model errors.

SELECTED PROJECTS

Bhojpuri Translation and AI Evaluation Sample | Apr 2026 - Present

- Building a 50-example personal benchmarking dataset to evaluate how current foundational LLMs handle regional nuances, code-switching, and idiomatic accuracy in Bhojpuri.
- Selected 10 high-signal examples for the resume sample, comparing natural Bhojpuri phrasing against literal Hindi-influenced output.
- Wrote English evaluation notes explaining morphology, syntax, semantic accuracy, tone, idiom, code-switching, register, and why specific model outputs sound unnatural.
- Covered everyday conversation, polite requests, task instructions, AI workflow language, and formal-versus-conversational register.
- Demonstrated native-speaker judgment for reviewing AI-generated Bhojpuri beyond literal meaning, including whether outputs preserve intent and cultural context.

Root-Cause Analysis: User Engagement Collapse Investigation | 23 Nov 2025

- Investigated a 17% watch-time drop after a recommendation model deployment using SQL, Python ETL, and segmented time-series analysis.
- Converted technical findings into a structured RCA narrative, showing ability to evaluate AI-system behavior and communicate corrective feedback.

EDUCATION AND CERTIFICATIONS

Bachelor of Science, Indira Gandhi National Open University, Expected Graduation: 2026

Google Data Analytics Professional Certificate | Data Science Course, GeeksforGeeks
